

PANAMA CANAL AREA BENEFIT PLAN

AXA ASSISTANCE PANAMA

Head Doctor Services at Home

Dear Members,

The Panama Canal Area Benefit plan initiates a program of primary care at home for their members. The members who are a part of this program will receive all medical care that does not require hospitalization, in the comfort of their residences.

These services will be provided by a group of physicians, specially trained to serve members in their residences.

This means that you simply have to visit the hospital in a case of emergency, or require hospitalization, consultations, preventive medicine and diseases.

All laboratory tests, vaccinations, cures and many other services will be provided at your residence.

To qualify for this program you must meet the following requirements:

- Bedridden patients
- Patients with chronic diseases
- Dependency functional patients
- Patients with limited economic resources.

Note: If the insured members have any questions or require guidance for the new service, please consult the service department at: AXA client: 204-9200.
